

ADVANCED REACTIVE JAMMER

The high quality, professional and cost-effective solution

KEY FEATURES

- Rugged Jammer, configurable for fixed, vehicle or portable operation
- Reactive, Active and Hybrid operation
- Extreme ease of use even for unskilled personnel
- Operational from 20MHz to 6 GHz (option for band extension)
- Instantaneous bandwidth of 450MHz for each sub-band jamming unit
- Frequency hopping possibility in the same sub-band jamming unit
- Up to 460W total output power
- Amplifier linearization for maximum power, efficiency and minimum IMD
- AI powered received signals analysis for most effective countermeasure
- Effective against RCIED, UAS and any kind of radio communication
- Programmable operating parameters
- Advanced self test included
- HTTPS built-in web server
- Anti-Tamper and Zeroize
- Fill Gun to upload mission files
- On-air synchronization for multiple jammer in the same operating area
- Communication unit option (as alternative to one of the sub-band jamming units)
